

European University Cyprus Library Information about OpenAthens

What is OpenAthens?

[OpenAthens](#) is an Identity and Access Management System used to authenticate eligible students, faculty and staff to the electronic resources delivered by the library of European University Cyprus. More importantly, OpenAthens provides the user with single sign-on access to both internal and external web based resources.

How do I login to OpenAthens?

Logging into [OpenAthens](#) could not be any simpler since all you need to do is use your EUC username and password. **There is no need to apply for a username and password or create an OpenAthens account.** Just use the same credentials as provided to you by the University (email and password). For staff and faculty these are the same credentials as you use to access your EUC computer.

Authenticating to OpenAthens

You can access [OpenAthens](#) from the [library webpage](#) or alternatively you will see the OpenAthens logo when you first login through **My EUC Login** located on the upper right side of EUC's webpage.

When accessing from the library webpage click on the OpenAthens Logo

EUC Library Catalog

The catalog allows you to search all the print titles and other material available at our library.

OpenAthens

OpenAthens is an Identity and Access Management System that is used to authenticate eligible students and faculty to the electronic resources delivered by the library of EUC.

Plemochoe Repository

Plemochoe is an open access institutional repository established for the sole purpose of gathering preserving and distributing original research material produced by the EUC faculty and researchers.

EUC E-Journals and Databases

The Library provides access to 120+ full-text and bibliographic databases through its subscriptions as a participant and a founding member of the Cyprus Academic Libraries Consortium and on an individual basis.

EUC E-Books

The library subscribes to several packages of e-books. Visit the links for full-text access.

Free E-Resources

There are many sites that offer open access to quality e-journals, e-books, historical documents and primary material, poetry, images and more. We collected some of the best ones on the internet.

You will face a login screen (see below). Click Login.

It is strongly recommended to begin your research by signing first to OpenAthens and then visiting the databases of your interest rather than the other way around.

Clicking login will take you to the EUC sign-in page (if you have not signed in yet).

The image shows the login page of the European University Cyprus library. It features a white login form centered over a background image of library bookshelves. The form includes the university's logo at the top, followed by two input fields: 'Enter EUC or Cyprus College Email:' and 'Password'. Below these is a checkbox labeled 'Keep me signed in'. A large orange button with the text 'LOG IN' in white capital letters is positioned below the checkbox. At the bottom of the form, there is a link that says 'FOR INSTRUCTIONS ON HOW TO LOGIN, PLEASE CLICK HERE!' and two links, 'FORGOT PASSWORD' and 'HELP', separated by vertical bars.

Logging in successfully will take you to your **MyAthens** page. Once logged in, you will remain authenticated throughout your browser session.

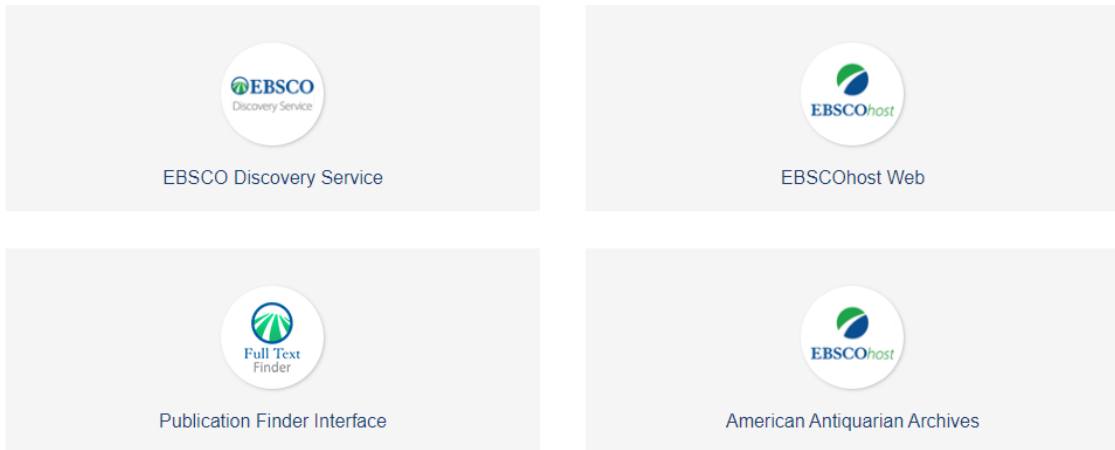

The screenshot shows the MyAthens library homepage. On the left is a dark blue sidebar with the MyAthens logo, the European University Cyprus logo, and links for 'Research zone' and 'Account'. The main content area is divided into several sections: 'EBSCO Discovery Service (EDS)' with a search bar, 'Open Access Content / Articles - CORE Discovery' with a search bar, 'Discover 70 resources' with a search bar and a list of resources including 'Academic Search Ultimate (EBSCO)', 'Access Medicine', and 'Access Physiotherapy', 'About EUC Library' with descriptive text, and 'EUC Library OPAC Catalog - Κατάλογος Βιβλιοθήκης' with a 'Library OPAC' button.

Points and Tips for easier searching sessions while using OpenAthens

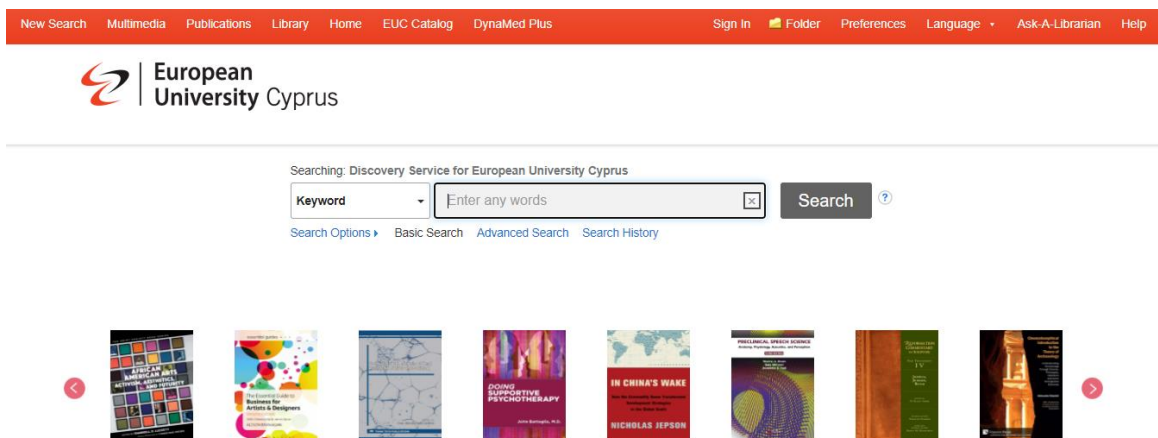

- Your MyAthens homepage lists all major resource providers but not all databases. For example, EUC library subscribes to over 40 EBSCO databases and over 15 Proquest databases. In total the library offers you access to over 130 not 70 databases.
- For a more detailed description of **all databases** visit [EUC E-Journals and Databases](#). Additionally, you can click on the “show more resources” button for brief summaries of the major databases.
- EBSCO EDS (left) searches with the exception of Qualex, Sakkoulas, Leginet (contact library), all 130+ subscription based databases. In addition, it searches all open access journals.
- The Open Content / Articles box (above) searches **ONLY** Open Access Journals. 216,000,000+ articles from over 10,000 data providers for free.

- **EBSCO EDS should be your starting point since it searches all databases concurrently.**

You can immediately start searching EBSCO EDS by entering a search word in the box.
You can also choose to visit the EBSCO EDS page from the list of resources.

Click on EBSCO Discovery Service and you can start searching

After you first basic search you can try to use **advanced search** (next image) in order to get more relevant results. For example, you can target your search results to be from a specific author, journal, or that the keywords you use are included in the abstract of every result by clicking on “select field”.

In the case, that you have narrowed down your research to a very specific topic from the beginning, it might be better to visit first specialized databases in order to eliminate irrelevant search results. For example, your search is related to law. You might want then to try first the law databases.

Therefore, it is important to visit the library webpage as to know all the databases and services available to you.

- Three databases need additional codes (Qualex, Sakkoulas Online, Leginet). Send an [email](#) to the library to receive the codes.

- Visit the [Library Guides](#) page to download and print manuals, guides, flyers on a number of services like Turnitin, Mendeley, Refworks.
